# coax<sup>®</sup> data sheet - pressure limitation valve

type SPB-N 32

03/2022

🗥 Above stated body materials refer to the valve port connections that get in contact with the media only!

#### details needed for main valve

	orifice	
	port	
	pressure regulating range	
	flow rate	
	media	
	media temperature	
	ambient temperature	
details needed for proportional valve		
	nominal voltage	
	actuation pressure range min/max	
	setpoint signal	

The valves' technical design is based on media and application requirements. This can lead to deviations from the general specifications shown on the data sheet with regards to the design, sealing materials and characteristics.

## 🗥 If order or application specifications are incomplete or imprecise there exists a risk of an incorrect technical design of the valve for the required application. As a consequence, the physical and / or chemical properties of the materials or seals used, may not be suitable for the intended application. To avoid hydraulic shocks in pipelines, the flow velocities must be taken into account when designing valves for liquids.

specifications not highlighted are standard specifications highlighted in grey are optional

### control valve proportional externally controlled

control value proportional	externaty controlled		
pressure range	PN 1-16 bar		
orifice	DN 32 mm		
connection	thread		
function	stepless pressure regulation T		

### operating principle body material

valve seat

ports

function

flow rate

media abrasive media flow direction settling time media temperature ambient temperature approvals mounting weight

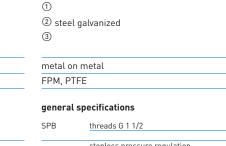

seal materials

pressure regulation range

additional equipment

actuation pressure range compressed air control actuator ports

nominal voltage current consumption control signals protection energized duty rating connection

externally controlled without spring return

options

options

options

SAE connections DIN ISO 6162

4

5

6)

SPB	threads G 1 1/2	
	stepless press	
bar	1-16	
m³/h	24,0	

# ure regulation

h	24,0
	liquid - highly viscous - contaminated

P⇔T	as marked	
ms	< 900	
°C	0 to +60	
°C	0 to +50	
	mounting holes	
kg	8,4	

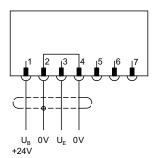

#### electrical specifications

UB	DC 24 V (max. residual ripple 10 %)		
DC	< 0,7 A		
Ue	0-10 V (Re 100 KΩ)	4-20 mA (RE 250 KΩ)	
IP65 (P54)	acc. DIN 40050		
ED	100 % (observe the connection conditions accordingly)		
	plug with 7 contacts / wire diameter 6-8 mm		

#### pneumatic specifications

bar	see actuation pressure-diagram
	DIN ISO 8573-1 grade of compressed air quality 5/4/3
	via 3/2 way proportional valve
1	G 1/8

### connection plan /

#### connection conditions

When supplying the electrical set point signal to the proportional valve, the actuating air must already be present. (see actuation pressure-diagram).

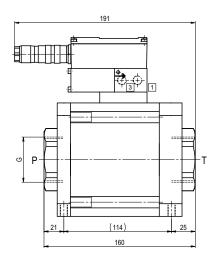

#### position of installation

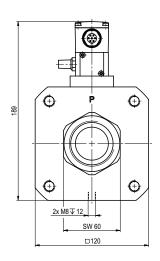

arbitrary, but regulator not downwards.

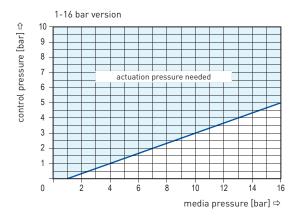

# coax<sup>®</sup> data sheet - pressure limitation valve

type SPB-N 32

### actuation pressure-diagram

Sound creation during low pressure circulation mode and flow Q= 24  $m^{\circ}/h$  ca. 70 dbA

#### pressureless circulation mode
