Marked with:

II 2G Ex h IIC T6 ...T3 Gb  
II 2D Ex h IIIC T -40 °C ...+195 °C Db

The valve itself generates only insignificant heat and can therefore be used under the responsibility of the operator in temperature classes T6 to T3, depending on the medium and ambient temperatures. However the permissible operating temperature of the valve depends on the design of the valve and can be found on the name plate!
